Marketing Funnel & Conversion Performance Analysis Report

1. Executive Summary

- Total Analyzed Visitors: 5,000

- Traffic-to-Lead Conversion Rate: ~34.8%

- Lead-to-Customer Conversion Rate: ~4.9%

- Overall End-to-End Conversion Rate: ~1.7%

2. Key Drop-off Points

- **Visitor to Lead Stage (65% drop):** Highest absolute loss of traffic occurs right at the landing page.

- **MQL to SQL Stage (~50% drop):** Major drop occurs when marketing leads are reviewed by sales, pointing to lead qualification gaps.

3. Channel Performance

- **Top Quality:** LinkedIn and Organic Search produced the highest Lead-to-Customer conversion rates.

- **Volume vs Quality:** Meta Ads brought high visitor traffic but showed higher drop-offs post-lead stage.

4. Actionable Recommendations

1. **Optimize Landing Pages:** Implement A/B testing on hero sections and reduce lead capture form fields to reduce initial bounce.

2. **Refine MQL Criteria:** Tighten qualification rules so low-intent leads do not consume sales team time.

3. **Reallocate Budget:** Shift spend from lower-converting paid social ads toward high-intent search ads and LinkedIn retargeting.
